

Thank you for purchasing the Yamaha "JUNIOR KIT" drum set.  
Before you use, please thoroughly read this Assembly Manual and use the drum set in a safe and proper manner.

Vi ringraziamo per avere acquistato il kit di batteria "JUNIOR KIT".  
Prima dell'utilizzo leggere attentamente questo manuale di assemblaggio per poter usare lo strumento in un modo sicuro e corretto.

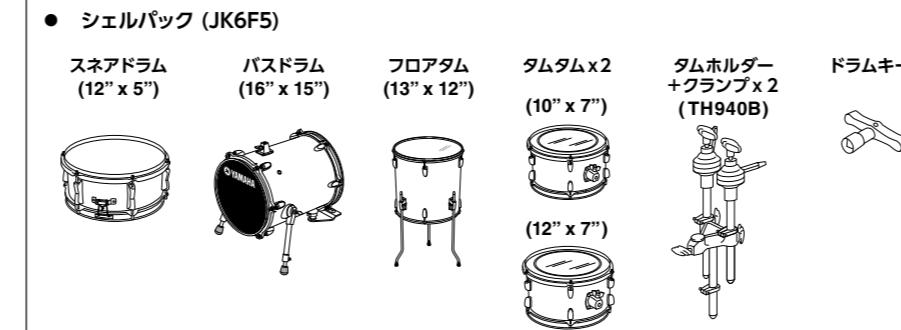

## Drum Set Components

## Éléments composant la batterie

## 梱包内容

Zunächst einmal vielen Dank für den Kauf des Schlagzeugsets „JUNIOR KIT“ von Yamaha.  
Bitte lesen Sie vor dem Gebrauch diese Montageanleitung aufmerksam durch und achten Sie auf sicheren und vorschriftsmäßigen Einsatz.

Vi ringraziamo per avere acquistato il kit di batteria "JUNIOR KIT".  
Prima dell'utilizzo leggere attentamente questo manuale di assemblaggio per poter usare lo strumento in un modo sicuro e corretto.

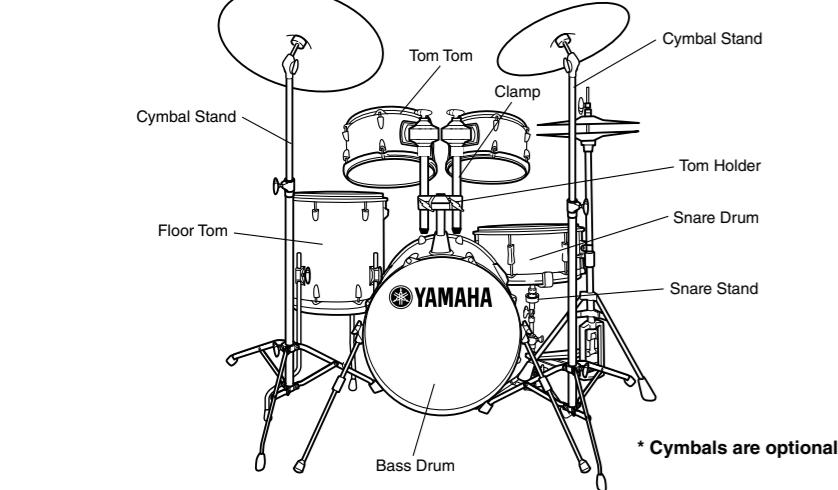

## Setting Up

**When making adjustments to your settings always make sure to loosen the fixing bolt. Parts will suffer damage if the part is adjusted with force when the fixing bolt is tightened.**

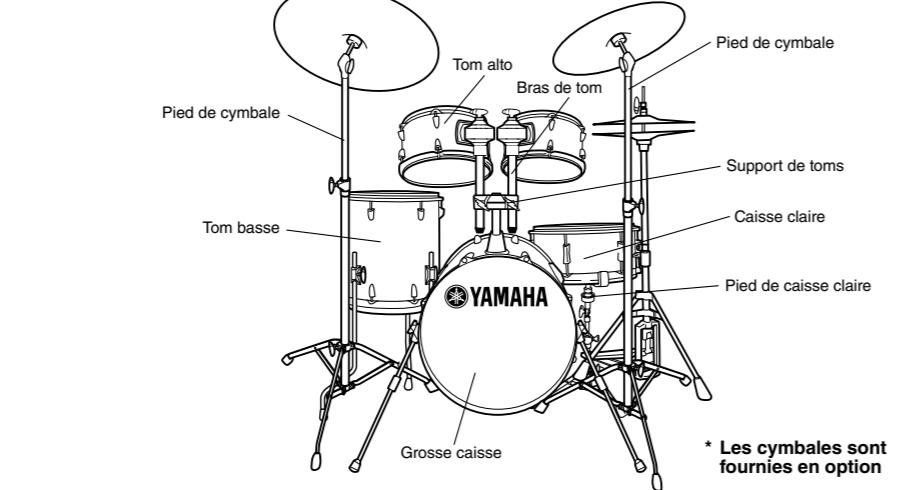

## Mise en place

**Lorsque vous ajustez les positions des différents éléments, veillez à bien desserrer le boulon de fixation correspondant. Vous risquez d'endommager les pièces si vous ajustez leurs positions en forçant, faute d'avoir desserré le ou les boulons concernés.**

## Front View

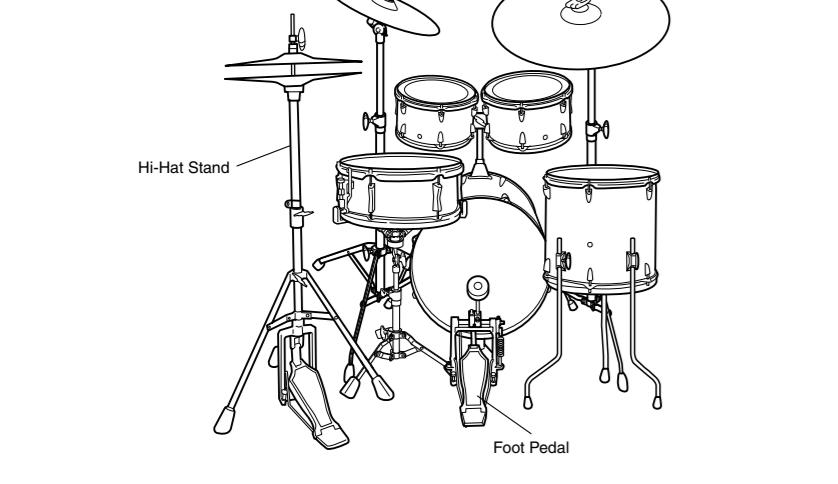

## Vue de face

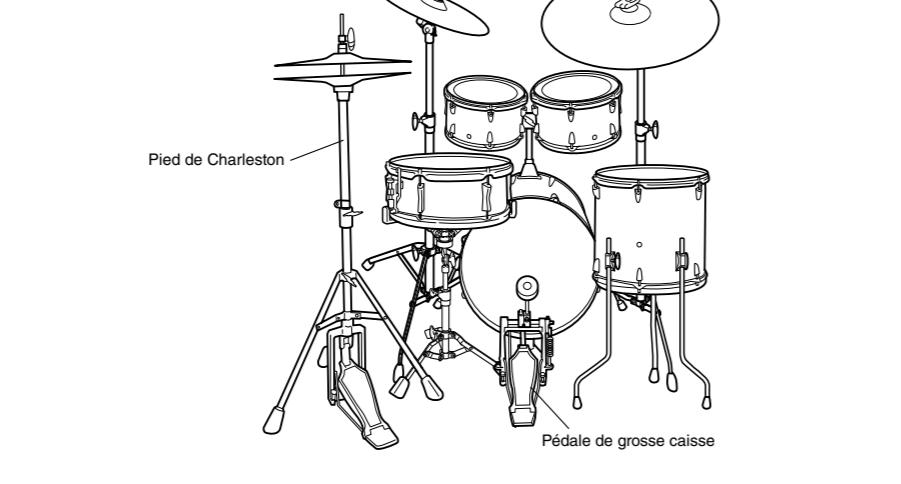

## セッティング例

**セッティングの調整を行う時は、必ず固定用ネジを緩めて行ってください。  
固定用ネジを締め付けたまま無理に調整しようと部品を破損する恐れがあります。**

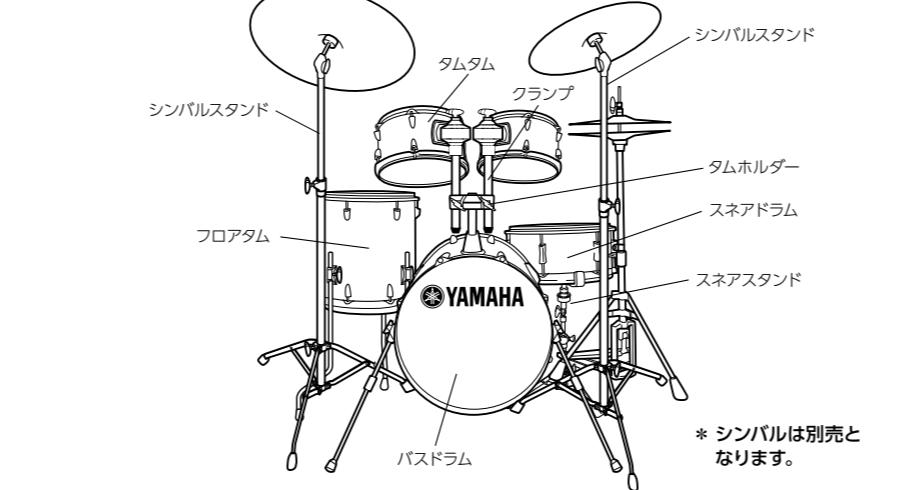

## Back View

## Vue arrière

## 正面

## Aufstellung

**Vergessen Sie beim Vornehmen von Einstellungen nicht, die betreffende Feststellschraube zu lösen. Wenn Sie versuchen, Einstellungen ohne Lösen der Feststellschraube vorzunehmen, können Teile Schaden nehmen.**

## Bass Drum Assembly

1. Place the head then the hoop onto the shell. Use the bass drum bolts and the bass drum hooks to secure the head and the hoop to the shell by tightening each bolt gradually in a diagonal fashion.

2. Loosen the bass drum leg bolts and rotate the bass drum legs. (Fig. A) then loosely secure the leg in place. Once you have determined the position of the leg, tighten the bass drum bolts to secure the leg in place. (An adjustment of the leg length is required for a long base and bass drum leg to fit in setting leg angles.) To adjust the leg length, loosen the bass drum length key bolt (Fig. C) with a drum key, adjust the length of the leg, and firmly tighten the length key bolt. Rotate the leg rubber either direction to secure the rubber to the bass drum leg. (Fig. C)

3. Insert the tom holder into the pipe clamp and firmly tighten the clamp bolt.

**About the memory clamp**  
Attaching the memory clamps to the clamps makes consecutive setups quick with consistent drum height and position.

**About the Ball Clamp**  
The ball clamp is used to adjust the angle of the playing surface and offers flexible tom setting.

## Assemblage de la grosse caisse

1. Placez la peau et son cerclage sur le fût. Servez-vous des boulons de grosse caisse et des crochets de grosse caisse pour fixer la peau et le cerclage sur le fût en serrant progressivement chaque boulon dans une séquence en diagonale.

2. Desserez les boulons des pieds de grosse caisse et faites-les pivoter (Fig. A) puis mettez-les approximativement en place. Une fois la bonne position de chaque pied déterminée, serrez le boulon correspondant pour le fixer dans cette position. (Une repère d'alignement figure sur chaque pied de grosse caisse pour aider à déterminer des réglages cohérents.) Pour ajuster la longueur du pied, desserez le boulon de réglage en longueur (Fig. B) à l'aide d'une clé de tom, ajustez la longueur du pied, puis resserrez fermement le boulon. Faites tourner l'extrémité en caoutchouc dans l'une ou l'autre direction pour la fixer au pied. (Fig. C)

3. Insérez le support de tom dans le collier de serrage correspondant et serrez fermement le boulon du collier.

**À propos du collier de serrage à mémoire**  
Fixer les colliers à mémoire aux colliers de serrage permet d'effectuer une installation rapide et retrouver d'une fois sur l'autre les mêmes hauteurs et positions de toms.

**À propos du collier à bille**  
Le collier à bille sert à régler l'angle de la peau du fût et offre une grande liberté de positionnement du tom.

**About the memory clamp**  
Attaching the memory clamps to the clamps makes consecutive setups quick with consistent drum height and position.

**About the Ball Clamp**  
The ball clamp is used to adjust the angle of the playing surface and offers flexible tom setting.

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Montage du support de grosse caisse (plateau de fixation de la pédale)**  
Insérez le support de grosse caisse dans l'ouverture prévue à cet effet dans la grosse caisse puis serrez le boulon correspondant.  
**Une fois la bonne position déterminée, serrez le bague mémoire.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.  
**After the position has been determined, set the memory clamp.**

**Attaching the BD Riser (Plate for FP Attachment)**  
Insérez le BD riser dans la pipe clamp et serrez-le.

Muchas gracias por la adquisición de la batería Yamaha "JUNIOR KIT". Antes de empezar a utilizar la batería, lea todo este manual de montaje.

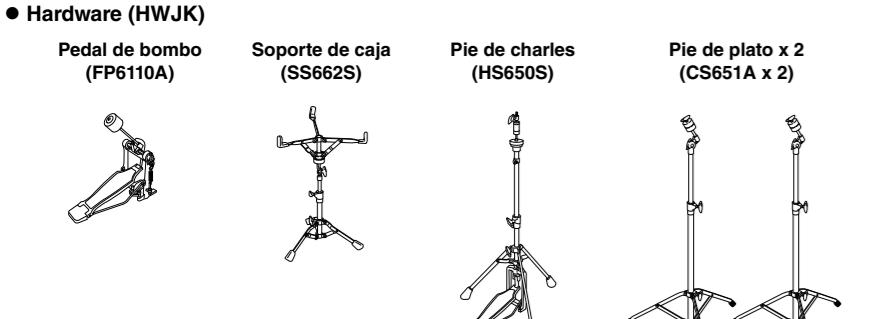

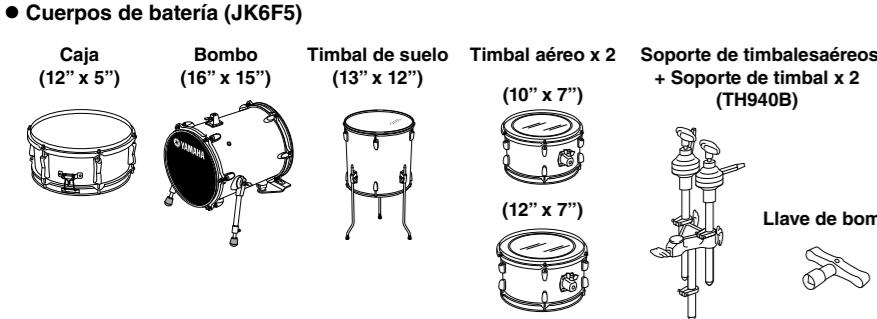

Obrigado pela sua escolha desta bateria "JUNIOR KIT" da Yamaha. Antes de usar, leia atentamente este Manual de Montagem e use a bateria de maneira segura e adequada.

秉承购买雅马哈“JUNIOR KIT”套鼓。在使用之前,请仔细阅读本组装说明书,并用安全而正当的方法使用该套鼓。

Yamaha "JUNIOR KIT" 드럼 세트를 구입해 주셔서 감사 드립니다. 사용하기 전에 본 조립 설명서를 주의 깊게 읽고 안전하고 올바른 방법으로 드럼 세트를 사용하십시오.

Благодарим вас за приобретение ударной установки JUNIOR KIT производства компании Yamaha. Перед использованием инструмента внимательно прочтите это руководство по сборке и используйте ударную установку безопасным и надежным образом.

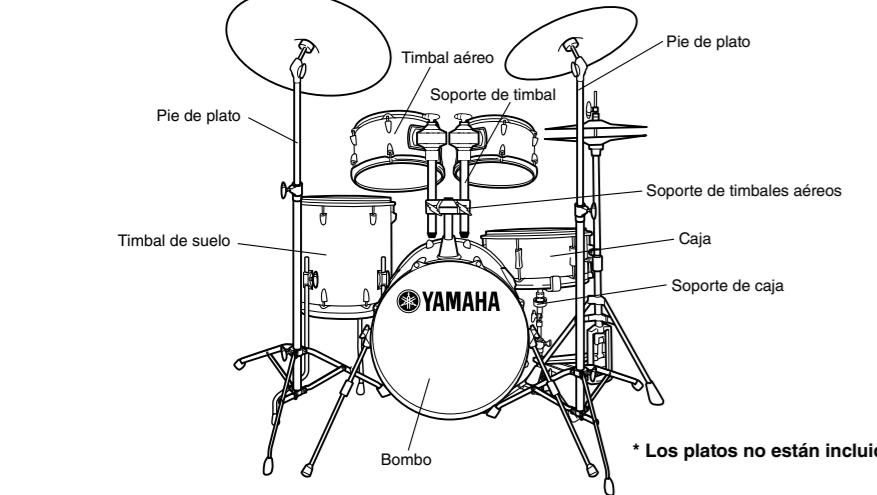

### ■ Componentes de la batería

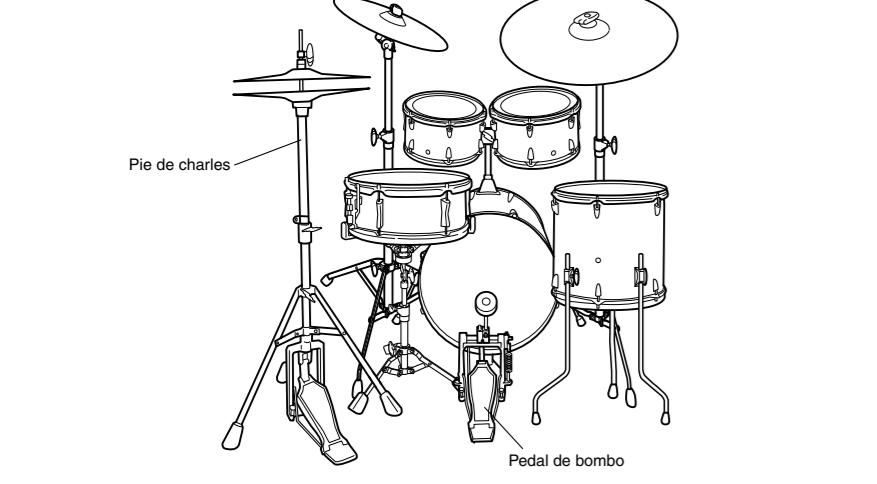

### ■ Preparativos

**⚠️** Cuando realice cambios en sus ajustes, no se olvide nunca de aflojar el tornillo de fijación. Si los componentes se ajustan a la fuerza, estando el tornillo de fijación apretado, se producirán daños en los componentes.

### ■ Vista frontal

### ■ Vista posterior

### ■ Montaje del bongo

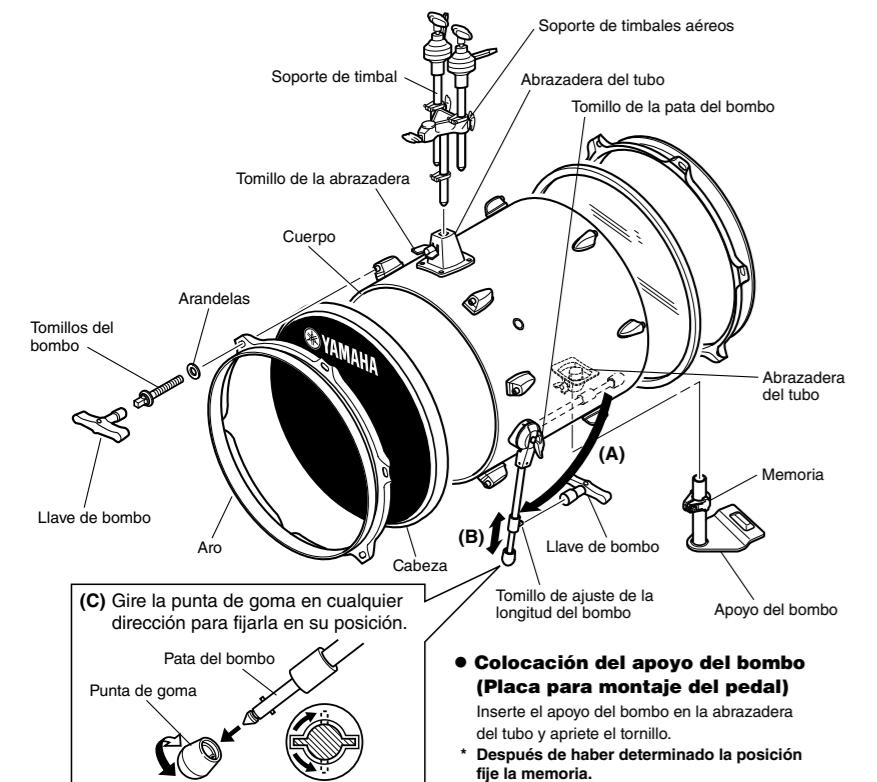

- Cólese el parche y luego el aro en el cuerpo. Emplee los pernos del bongo y los ganchos del bongo para fijar el parche y el aro al cuerpo apretando gradualmente cada perno en diagonal.
- Afloje los tornillos de la pata del bongo y gire la pata del bongo (Fig. A) y, luego fije la pata en su lugar a modo provisional. Una vez haya determinado la posición de la pata, apriete los tornillos del bongo para fijar la pata en su lugar. (Se incorpora un calibrador de alineación en la base de la pata del bongo y en la pata del bongo para ayudarle a ajustar los ángulos de la pata.) Para ajustar la longitud de la pata, afloje el tornillo del pie del bongo para ajustar los ángulos de la pata (Fig. B) con una llave de bongo; ajuste la longitud de la pata, y apriete con seguridad el tornillo de la pata para la longitud. Gire la goma de la pata en cualquier dirección para fijar la goma a la pata del bongo. (Fig. C)
- Inserte el soporte de timbales aéreos en la abrazadera del tubo y apriete firmemente el perno de la abrazadera.

#### \* Acerca de la abrazadera con memoria

El montaje de las abrazaderas con memoria en las abrazaderas de los timbales facilitará el montaje en futuras ocasiones ofreciendo una altura y una posición consistentes.

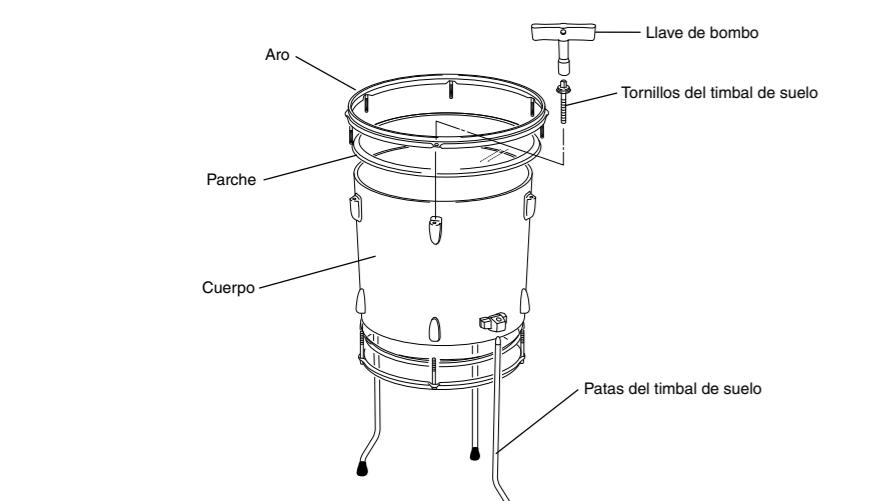

#### \* Acerca de la abrazadera de bola

La abrazadera de bola se emplea para ajustar el ángulo de la superficie donde se toca ofrece un montaje flexible del timbre.

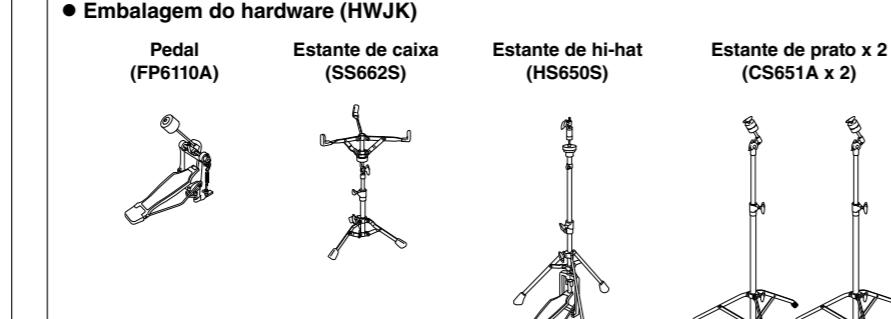

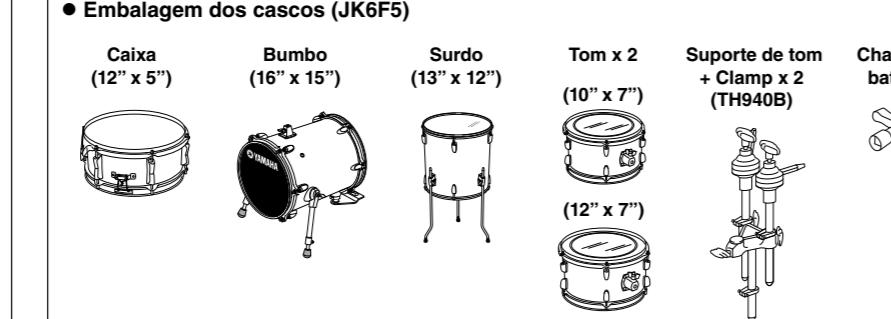

### ■ Montaje del soporte del timbal

- Del mismo modo que hizo con el bongo, ponga el parche y luego el aro en el cuerpo del timbal, coloque los tornillos del timbal de suelo y apriételos. Emplee la llave de bongo en cada parte y apriete un poco cada vez cada tornillo en diagonal.
- Instale los pies del soporte del timbal. Para estabilizar firmemente el montaje, asegúrese de extender los pies siguiendo los ángulos adecuados de la circunferencia del tambo.

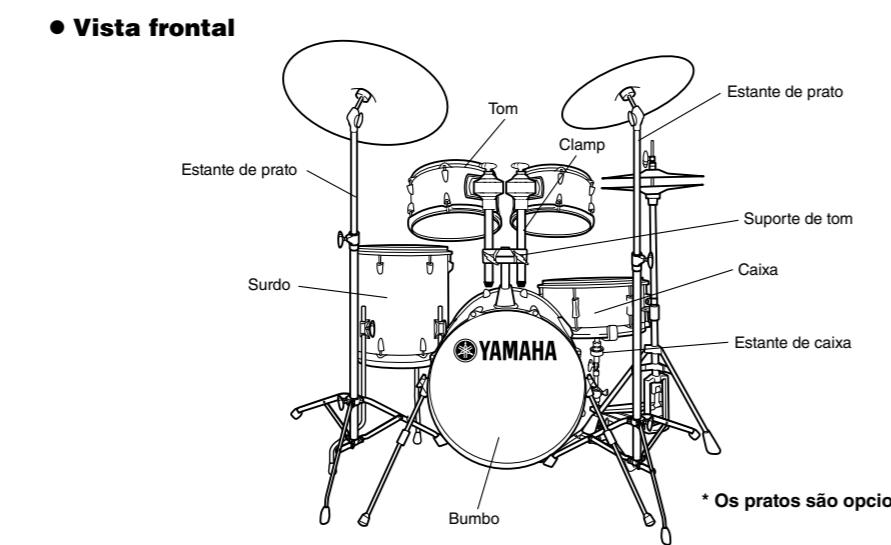

### ■ Componentes da bateria

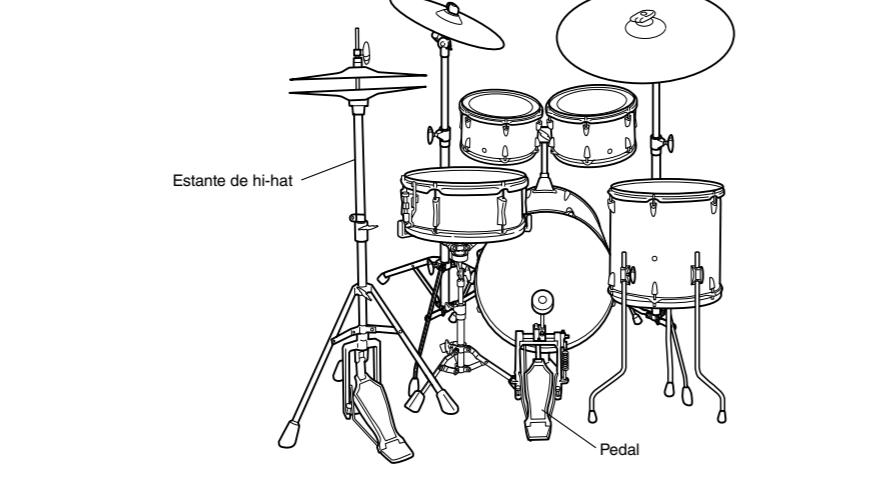

### ■ Instalação

**⚠️** Ao fazer ajustes em qualquer colocação, certifique-se sempre de afrouxar o parafuso de fixação. As peças sofrerão danos se forem ajustadas forçosamente com o parafuso de fixação apertado.

### ■ Vista frontal

### ■ Montagem do bumbo

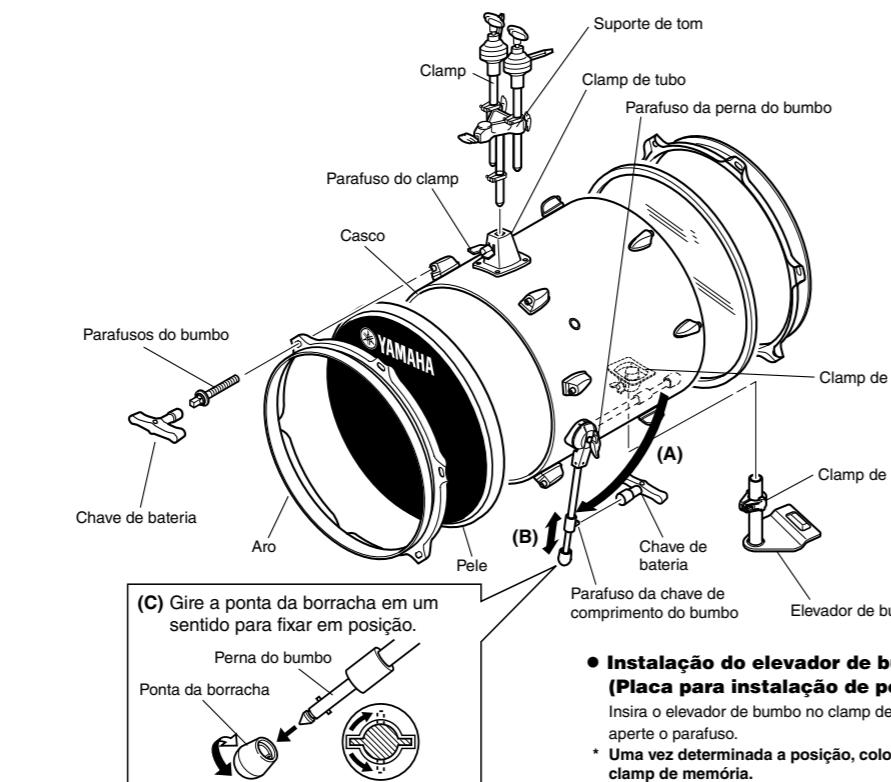

- Cólese a pele e, em seguida, o aro no casco. Use os parafusos e os ganchos do bumbo para fixar a pele e o aro no casco, apertando cada parafuso gradualmente em um padrão diagonal.
- Afrouxe os parafusos das pernas do bumbo, gire as pernas do bumbo (Fig. A) e, em seguida, segure firmemente a perna em posição. Deterior de determinar a posição da perna, aperte os parafusos do bumbo para fixar a perna em posição. (Há um indicador de alinhamento na base da perna do bumbo e no bumbo para ajudar a determinar o ângulo da perna.) Para ajustar a altura da perna, afrouxe o parafuso da chave de comprimento da perna do bumbo (Fig. B) com a chave de bateria, ajuste o comprimento da perna e, em seguida, aperte o parafuso da chave de comprimento firmemente.
- Insira o suporte de tom no clamp de tubo e aperte o parafuso do clamp firmemente.

#### \* Sobre o clamp de memória

Instalar clamps de memória nos clamps permite acelerar configurações consecutivas com uma altura e posição consistentes da bateria.

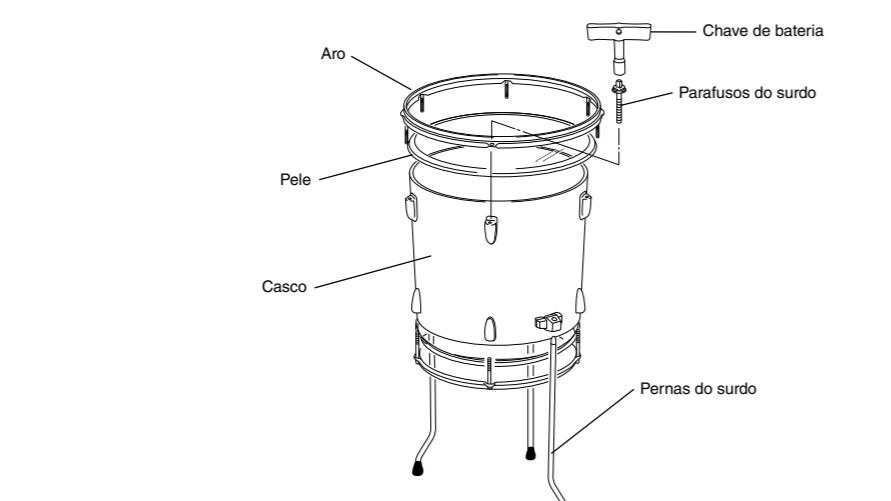

#### \* Sobre o clamp estérico

O clamp estérico é usado para ajustar o ângulo da superfície de execução e oferece uma colocação flexível do tom.

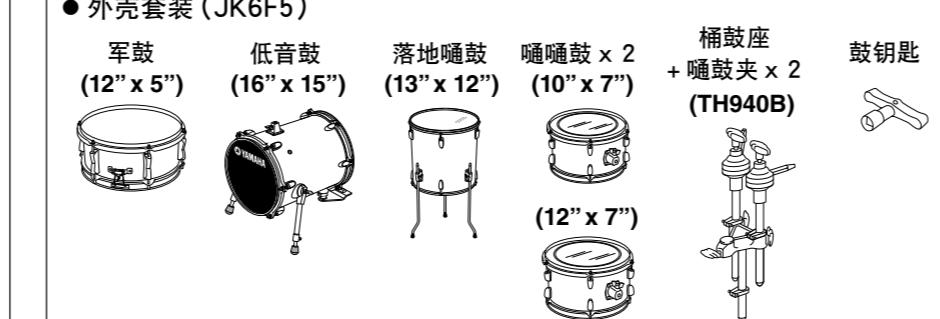

### ■ Montagem do surdo

- Exatamente como você fez para o bumbo, coloque a pele e, em seguida, o aro no casco, fixe os parafusos do surdo e aperte. Use a chave de bateria para apertar cada parafuso um pouco de cada vez, em um padrão diagonal.
- Instale as pernas do surdo. Para estabilizar o conjunto firmemente, certifique-se de que as pernas estejam estendidas para fora em ângulos retos em relação à circunferência da bateria.

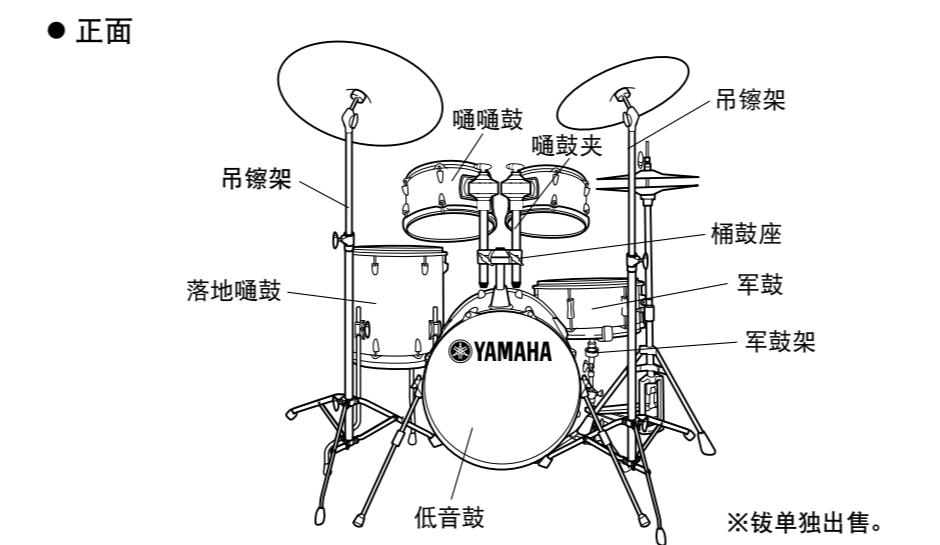

### ■ 套鼓组成

### ■ 安装

**⚠️** 对设置进行调整时,请务必拧松固定螺钉。固定螺钉紧固时,用力调整零件,将会损害零件。

### ■ 正面

### ■ 装置

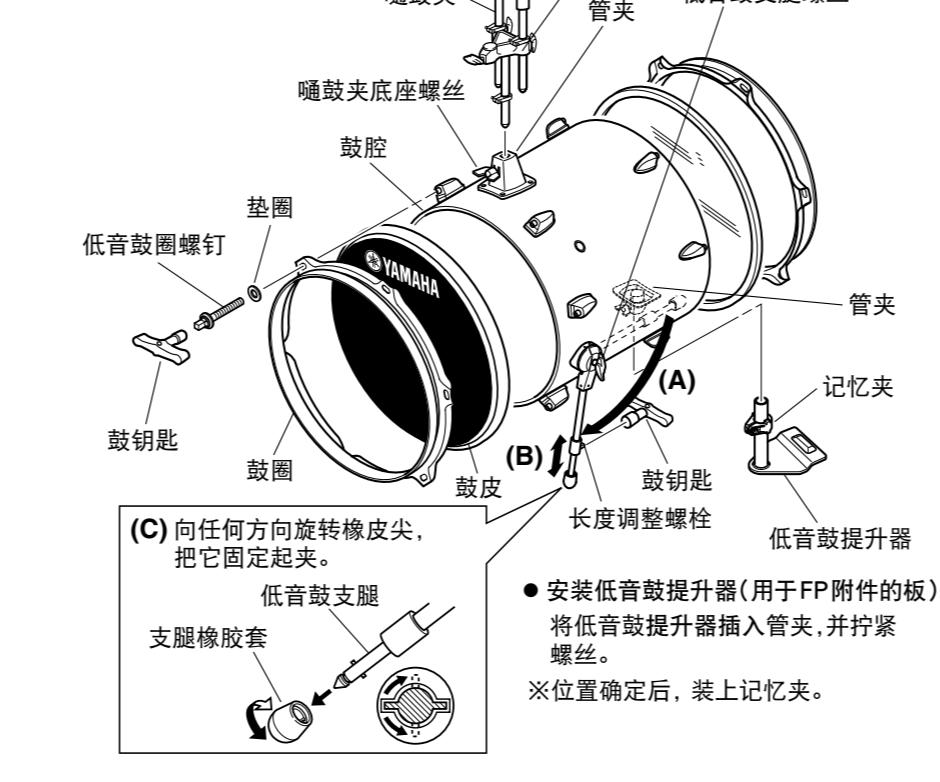

- 将设备和鼓腔先后安放到鼓腔上。用低音鼓螺钉和低音鼓挂钩将鼓皮和鼓圈固定到鼓腔上,以对角方式逐步拧紧各螺钉。
- 将低音鼓支腿螺丝拧松,旋转低音鼓支腿,然后将支腿稍微拧紧定位。(图A)一旦确定支腿的位置,就可以拧紧低音鼓支腿螺丝将支腿固定定位(在低音鼓支腿底座和低音鼓支腿上备有对准规,以便设定低音鼓支腿的角度)(图B)。用鼓钥匙将低音鼓支腿的长度调整到拧松(图B),调整支腿的长度,然后加以拧紧,向左或向右旋转支腿将橡胶套将橡胶套紧紧锁在低音鼓支腿上。(图C)
- 将低音鼓底座插入管夹并拧紧管夹螺钉。

#### \* 关于记忆夹

将记忆夹固定在鼓腔合适的位置上,之后每次安装设置就可以保持相同的高度。

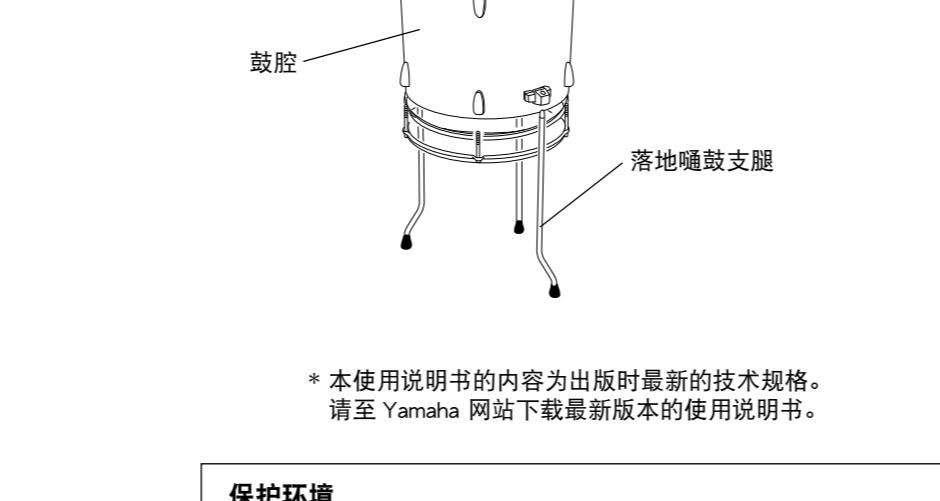

#### \* 关于球夹

球夹使调整鼓打击面的角度,使鼓腔的设置范围大大扩展。

### ■ 落地嗵鼓总成

- 将鼓皮和鼓圈先后放置到落地嗵鼓腔上,装上落地嗵鼓钉并拧紧。始终使用敲钥匙,以对角方式逐渐地拧紧各个螺钉。
- 安装落地嗵鼓脚。为了使落地嗵总成有较好的稳定性,鼓脚的伸出方向需要与鼓腔的圆弧面垂直。

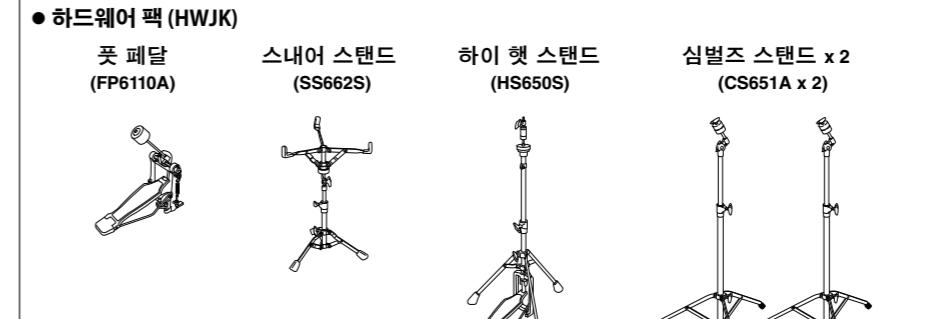

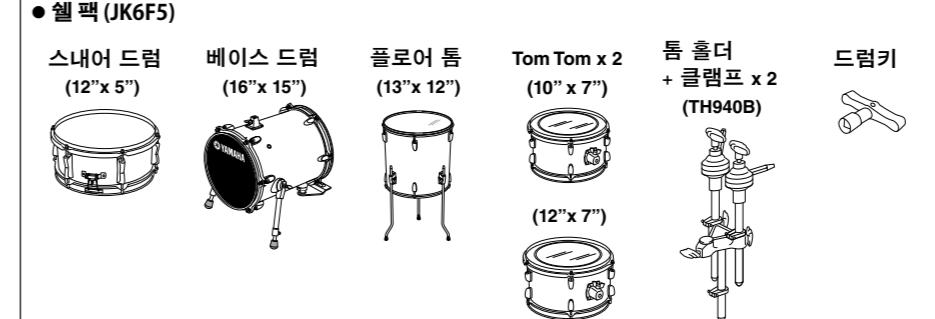

\* 本使用说明书的内容为出版时最新的技术规格。  
请至 Yamaha 网站下载最新版本的使用说明书。

### ■ 保护环境

如果需要废弃设备时,请与本地相关机构联系,获取正确的废弃方法。  
请勿将设备随意丢弃或作为生活垃圾处理。

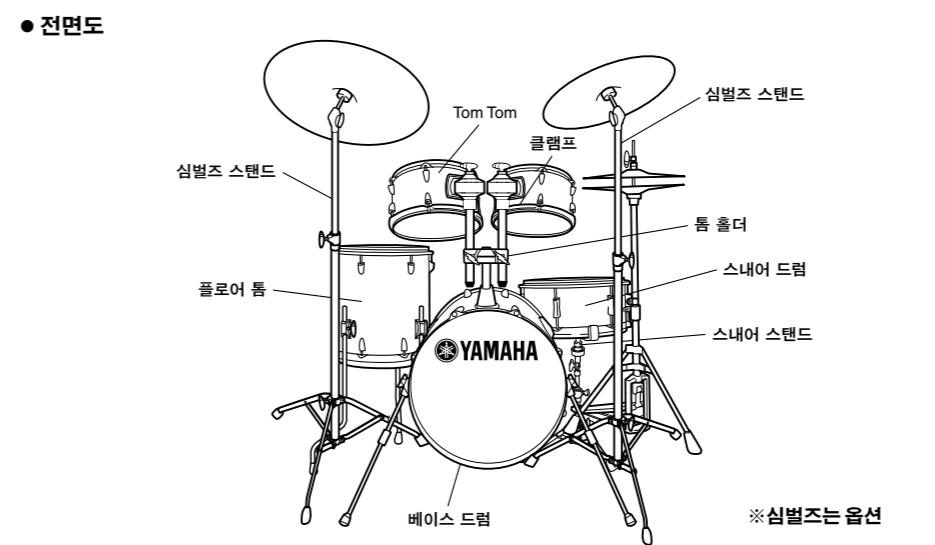

制造商:雅马哈株式会社

产品标准编号:QB/T 2838

### ■ 드럼 세트 구성 부품

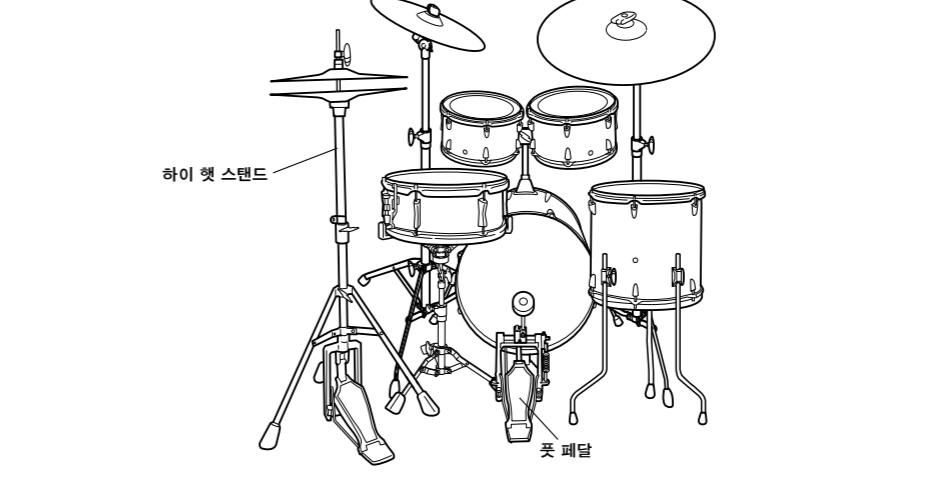

### ■ 설치

**⚠️** 설치된 제품 조정 시 항상 고정 볼트를 느슨하게 돌아야 합니다.  
고정 볼트가 조여진 상태에서 부품에 힘을 가하여 조정할 경우 부품이 손상될 수 있습니다.

### ■ 전면도

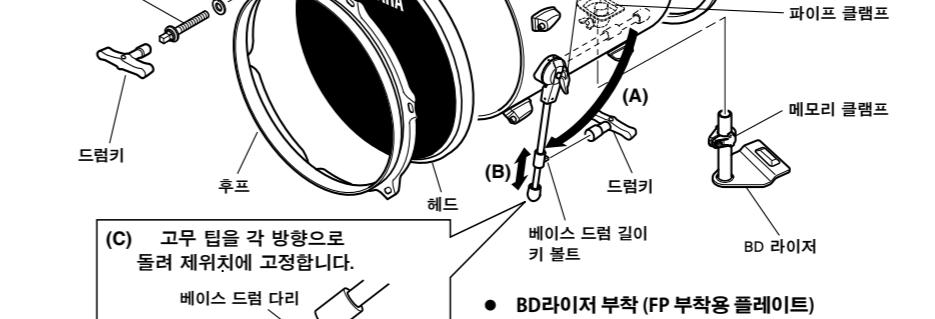

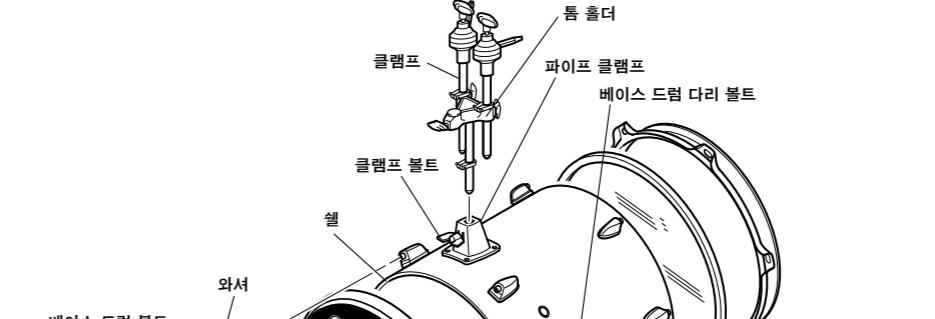

### ■ Установка

- При регулировке обязательно ослабляйте крепежный болт.  
Если применить силу при регулировке детали, не ослабив болт, деталь может поломаться.

**● Комплект барабанов (JK6F5)**

- Снейер драм (12'' x 5'')
- Бейс-драм (16'' x 15'')
- Плюроу том (13'' x 12'')
- Том Том x 2 (10'' x 7'')
- Том Холдер + Геллард (TH940B)
- Драмки

### ■ 装置

- Поместите пластик, а затем обрн на корпус барабана. Используйте болты бас-барабана и крючки бас-барабана для закрепления пластика и обрн на корпус барабана, затягивая постепенно каждый болт крест-накрест.
- Ослабь те болты на ножках бас-барабана, поверните ножки, а затем затяните болты, но не до конца. После определения положения ножек затяните болты бас-барабана, чтобы зафиксировать их.  
\*(Для облегчения регулировки узлов ножек, если затянуты болты, пометьте их крестиком.)
- Вставьте держатель тома в зажим трубки и надежно затяните зажимом болт.
