

Created to convey the authentic sound of every musical instrument.

Headphones that embody true Yamaha quality with incredibly detailed sound and superb comfort.

### Concert Quality Sound

- Sound quality that meets Yamaha's highest standards
- Open-air design for natural sound and long use without listening fatigue
- Large 40mm (1-5/8") driver produces powerful bass sound

### Comfortable Fit and Convenient Use

- Earpad ensures superb comfort, as well as optimum sound quality
- Earpiece swivel and headband length adjustment ensure comfortable fit
  - Collapsible design with 110-degree swivel earpieces
  - Adjustable headband for best fit
- 1.2m (47-1/4") cord is ideal for portable music players and electronic music instruments

### Concert Quality Sound

#### Made to Yamaha's High Quality Standards

As a leading musical instrument manufacturer, Yamaha combines rich experience with a strong focus on musical quality. Now Yamaha has used its expertise to create superior monitor headphones. Paying particular attention to the configuration of the drive unit and housing, as well as the earpad assembly, Yamaha designed the HPH-200 to deliver highly detailed instrumental music with precisely faithful sound reproduction.

#### Open-Air Design for Natural Sound and Long Use without Listening Fatigue

The HPH-200 is an open-air type with a metallic grill for the housing, providing optimum monitor performance with an appropriate amount of sound dispersion so that listening fatigue will not be a problem even after long hours of use. In addition, because they are non-airtight so surrounding sounds are audible, these headphones are ideal for use when playing with another instrument or even in group sessions.

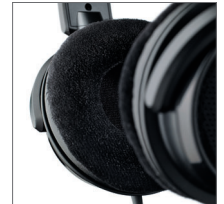

#### Large Driver Produces Powerful Bass Sound

The large 40mm (1-5/8") driver uses a powerful magnet. It delivers wide dynamic range and deep bass, so both vocals and musical instruments are reproduced with an energetic and lively sound.

### Comfortable Fit and Convenient Use

#### Earpad Ensures Superb Comfort, as well as Optimum Sound Quality

The soft velour-like earpad provides a pleasant feeling, extremely comfortable fit. Additionally, because the earpad affects sound quality, its material and shape have been carefully chosen to match the headphone unit, ensuring both maximum comfort and optimum sound quality.

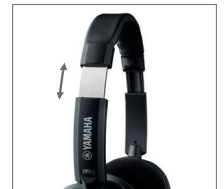

#### Earpiece Swivel and Headband Length Adjustment Allow Convenient Storage and a Comfortable Fit

The adjustable earpieces not only perfectly match the shape of your head, they swivel to a flat position for easy storage and carrying. The size of the headband can also be adjusted, ensuring a comfortable fit.

Earpieces can be rotated inside 20° and outside 90°

Length can be adjusted by 3cm (1-1/8") on each side.

#### 1.2m (47-1/4") Cord is Ideal Length for Convenient Connection

The cord is a convenient length for plugging into portable music players and electronic instruments. It doesn't hold its shape, so won't get tangled and uncoils smoothly. Both the plug and accessory plug are gold-plated for maximum sound quality.

#### Accessories

Main Specifications	HPH-200
Type	Dynamic, open air
Driver Unit	Φ40 mm (1-5/8")
Impedance	48 ohms
Sound Pressure Level	98.5 dB ±3 dB
Maximum input	1,000 mw
Frequency Response	20 Hz - 20 kHz
Weight (w/ Cable)	180 g (396.83 lbs)
Cable Length	1.2 m (47-1/4")
Connectors	3.5 mm (1/8") stereo, 6.3 mm (1/4") stereo
