

CVP-409GP/409/407/405/403/401 CGP-1000 PSR-S900/S700

Version 1.30 New Functions

For USB Wireless LAN adapter Users

Yamaha has updated the firmware of CVP-409GP/409/407/405/403/401, CGP-1000 and PSR-S900/S700 from Version 1.00 to Version 1.30. This version provides additional functions and has some changed Wireless LAN displays.

The instrument now includes settings for the robust WPA and WPA2 security formats, and as a result the settings for Wireless LAN have been added and changed.

Please replace the chapter of “Wireless LAN” in your owner’s manual below with the following instructions, then configure the settings.

- CVP-409GP/409/407 (page 185)
- CGP-1000 (page 185)
- CVP-405/403/401 (page 181)
- PSR-S900/S700 (page 180)

NOTE For details on how to check the version for the instrument you are using, refer to the chapter “Displaying the version number” in your owner’s manual.

- CVP-409GP/409/407 (page 20)
- CGP-1000 (page 20)
- CVP-405/403/401 (page 20)
- PSR-S900/S700 (page 21)

NOTE For details on how to update, visit the following URL:
<http://services.music.yamaha.com/radio/connect.html>

NOTE Some USB Wireless LAN adaptors do not support WPA and WPA2. For a list of USB Wireless LAN adaptors whose compatibility have been confirmed by Yamaha, visit the Yamaha website:
<http://download.yamaha.com/>

Wireless LAN Page

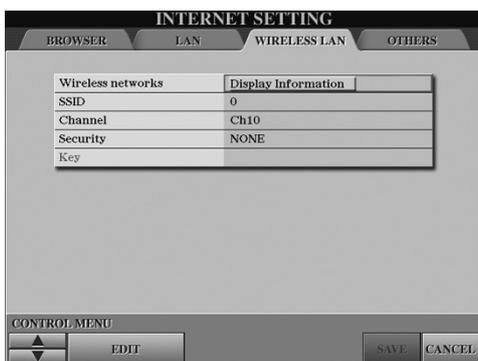

The settings here are necessary only when using a USB Wireless LAN adapter.

These settings must be the same as the settings on the access point (the Wireless LAN router) you are using.

* The settings below are not necessary when using a Wireless Game Adaptor.

* The illustrations and displays as shown in this guide are for instructional purposes only, and may appear somewhat different from those on your instrument. The display shown in this guide is taken from the CVP-409.

Select the item by using the [DATA ENTRY] dial and [ENTER] button, then press the [1 ▲▼] button to set the item.

| | |
|-------------------|---|
| Wireless networks | Determines whether or not Wireless Networks are displayed. |
| SSID | Determines the SSID setting. (SSID is an identification name for specifying a particular network over a wireless LAN connection.) |
| Channel | Determines the channel. |
| Security | Determines the security. <ul style="list-style-type: none"> ● NONE ● WPA-PSK (AES) ● WEP ● WPA2-PSK (TKIP) ● WPA-PSK (TKIP) ● WPA2-PSK (AES) |
| Key | These settings are available only when Encryption above is enabled. Determines the same key settings on the access point (the Wireless LAN router) you are using. The type and length of the encryption key for the wireless network can be automatically made. |

To save the settings, press the [7 ▲▼] (SAVE) button.

To cancel, press the [8 ▲▼] (CANCEL) button.

About Using BSD-Licensed Software
