NEW PRODUCT BULLETIN

## USB Digital Connection for iPod and iPhone on the Front Panel

A USB port on the front panel provides convenient connection for your iPod/iPhone, which also charges when connected. Because the digital signal from the iPod/iPhone is transmitted directly to the AV Receiver, noise interference is minimised and sound quality is much better.

## On-Screen GUI (Graphical User Interface)

This clean and simple interface makes setup and other operations extremely easy. The on-screen display can show album art, provides a choice of various languages and is visible over 3D images.

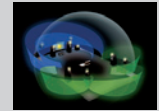

## Front HDMI Input with 3D and CEC Compatibility

An HDMI terminal on the front panel makes it easy to quickly connect a camcorder or digital camera. All of the HDMI terminals are compatible with 3D and CEC, so are convenient for connecting a TV and Blu-ray Disc player.

## CINEMA DSP 3D with Virtual Presence Speaker

CINEMA DSP 3D provides a wide, high and dense sound field. HD Audio format decoding lets you enjoy HD Audio sources. Virtual Presence Speaker delivers 3-dimensional sound without actual use of presence speakers.
