USB Digital Connection for iPod and iPhone on the Front Panel

A USB port on the front panel provides convenient connection for your iPod/iPhone, which also charges when connected. Because the digital signal from the iPod/iPhone is transmitted directly to the AV Receiver, noise interference is minimised and sound quality is much better.

On-Screen GUI (Graphical User Interface)

This clean and simple interface makes setup and other operations extremely easy. The on-screen display can show album art, provides a choice of various languages and is visible over 3D images.
Front HDMI Input with 3D and CEC Compatibility

An HDMI terminal on the front panel makes it easy to quickly connect a camcorder or digital camera. All of the HDMI terminals are compatible with 3D and CEC, so are convenient for connecting a TV and Blu-ray Disc player.

CINEMA DSP 3D with Virtual Presence Speaker

CINEMA DSP 3D provides a wide, high and dense sound field. HD Audio format decoding lets you enjoy HD Audio sources. Virtual Presence Speaker delivers 3-dimensional sound without actual use of presence speakers.
