

Yamaha DTX900 Extension V1.1.1 for Mac Release Notes

Main Revisions and Enhancements

V1.1.0 -> V1.1.1

- Now supports OS X 10.8 (Mountain Lion).
- Solved some minor problems.

Minimum System Requirements

NOTE

- Note that the system requirements may be slightly different from those described below depending on the particular computer.
- Keep in mind that the software is often updated and the system requirements are subject to change. You can check the latest version information of each program and its system requirements at the following website:

<http://download.yamaha.com>

OS	Mac OS X 10.5/ Mac OS X 10.6/ Mac OS X 10.7/ OS X 10.8
Computer	Intel processor (non-compliant with Power PC)
DAW Application	Cubase 5 series/ Cubase 6 series
Others	These system requirements conform to those of the OS and DAW applications.

For users of OS 10.7.5 or later version

Before installing or uninstalling the application, select Apple menu > System Preferences... > Security & Privacy > General tab under the header "Allow applications downloaded from," then set the Gatekeeper's option to "Mac App Store and identified developers."

Note

If you have not changed the default setting of Gatekeeper, the upper operation is not necessary.

Installing the application

1. After the downloaded compressed file is properly extracted, double-click a following file.
Install DTX900 Extension V1.1.1.pkg
2. Follow the on-screen instructions to install the software.

Uninstalling the application

1. After the downloaded compressed file is properly extracted, double-click a following file.
Uninstall DTX900 Extension.app
2. Follow the on-screen instructions to uninstall the software.

Version History

V1.0.0 -> V1.1.0

- Now supports Cubase 6 series (64 bit) programs.
- Now Power PC is non-compliant.
- Solved some other minor problems.
